

Together for girls

Ending violence against children

Michele Moloney-Kitts

February 9, 2016

What's wrong with this picture?

Age of Individual Seeking Post-Rape Care

Source: Keesbury, Jill, Lynne Elson, Mary Zama, and Lucy Ng'ang'a. 2011. "PEPFAR Special Initiative on Sexual and Gender-based Violence: Final evaluation." Lusaka: Population Council

Girls and boys experience high rates of sexual violence prior to age 18

Percentage of individuals 18-24 years old who experienced sexual violence prior to age 18

*Only girls interviewed in Swaziland

**Updated denominator for Tanzania lifetime prevalence indicators of childhood violence uses 18-24 year olds prior to age 18; lifetime prevalence indicators from 2011 Tanzania VACS report use the denominator of 13-24 year olds prior to age 18.

High unintended pregnancy rates reported

as a result of **pressured or physically forced sex**

Percentage of females 18-24 who reported a pregnancy resulting from physically forced and/or coerced sex during their lifetime*

*Tanzania numbers may differ from the Violence Against Children Final Report, 2009 due to different analytic approaches.

**For Malawi and Tanzania data reflects % of females 18-24 who experienced physically forced and/or pressured sex before 18, who said at least one pregnancy resulted from childhood sexual violence.

Too often, violence goes unreported

Disclosure and service usage by individuals who experienced childhood sexual violence, as reported by 18 to 24 year olds*

* Reported by 13-24 year olds in Tanzania

Thank You
